PROFESSIONAL SUMMARY

AI Engineer and B.S. Artificial Intelligence candidate who builds end-to-end machine-learning and LLM applications with Python, scikit-learn, FastAPI, and modern web interfaces. Experienced in leakage-aware modeling, realistic validation, API integration, and explainable decision-support workflows. Currently developing content-opportunity models at FlyRank AI.

TECHNICAL SKILLS

AI & ML: Machine Learning, Generative AI, LLMs, RAG, AI Agents, scikit-learn, pandas, NumPy, LangChain, LangGraph, Hugging Face, vector databases

Applications & Tools: Python, FastAPI, Pydantic, REST APIs, Streamlit, React, TypeScript, Tailwind CSS, Jupyter, pytest, Git, GitHub

EXPERIENCE

Machine Learning Engineer | FlyRank AI

June 2026 - Present | Pakistan

- Built a content-refresh scoring pipeline across **30,000 anonymized search-content records**, covering feature preparation, baselines, model comparison, evaluation, and ranked recommendations.
- Compared logistic regression, decision tree, and random forest models with a client-holdout split; selected a random forest reaching **0.68 Precision@50** versus **0.24** for the rules baseline.
- Produced an explainable review queue with **3,576 high-confidence opportunities**, reason codes, privacy safeguards, and human editorial review guardrails.

SELECTED PROJECTS

DeliveryGuard AI - Late-Delivery Risk Prediction | [GitHub](#)

Python, scikit-learn, FastAPI, React, TypeScript, Tailwind CSS, pytest

- Built a leakage-aware random-forest pipeline trained on **144,415** historical orders and evaluated on the newest **36,104** orders using a chronological holdout.
- Achieved **77.05% ROC AUC**, **71.80% accuracy**, and **84.99% precision**; exposed class and probability outputs through typed FastAPI endpoints and a responsive React dashboard.
- Added PII removal or hashing, request validation, OpenAPI documentation, and automated tests for preprocessing, inference, and API behavior.

Mindsignal - Mental Health Score Predictor | [GitHub](#)

Python, Random Forest, scikit-learn, FastAPI, HTML, CSS, JavaScript

- Developed a regression pipeline on **5,000** lifestyle and digital-behavior records with numeric scaling, ordinal encoding, and one-hot encoding; achieved **R2 0.8975** and **MAE 0.3103** on the test set.
- Connected the trained model to a FastAPI service and responsive prediction interface, with input validation, privacy-focused handling, and a clear non-diagnostic disclaimer.

Resume Screening and Shortlisting System | [GitHub](#)

Python, Flask, SQLite, pandas, PDF/DOCX parsing, HTML, CSS

- Built a recruiter workflow that bulk-parses PDF, DOCX, TXT, and Markdown resumes, extracts the top job-description terms, scores keyword overlap, ranks candidates, and applies configurable shortlist thresholds.
- Implemented password-hashed accounts, SQLite screening history, responsive results, and CSV shortlist export for repeatable hiring reviews.

EDUCATION & CERTIFICATIONS

B.S. Artificial Intelligence, Iqra National University, Peshawar | 2024 - 2028 (Expected)

Certifications: Claude Code - Anthropic Education; Introduction to Claude Cowork - Anthropic Education; Complete Generative AI Course with LangChain and Hugging Face
