SKILLS

- Machine Learning
- Scikit-learn
- Pandas
- NumPy
- Python
- Generative AI
- LLMs
- RAG
- AI Agents
- LangChain
- LangGraph
- Hugging Face
- Vector Databases
- FastAPI
- Pydantic
- REST APIs
- Git
- GitHub

SUMMARY

Innovative AI Engineer with expertise in developing end-to-end machine learning and LLM applications using Python, scikit-learn, and FastAPI. Delivered a content-refresh scoring pipeline that enhanced precision metrics and generated high-confidence review opportunities. Currently advancing content-opportunity models, focusing on effective API integration and explainable decision-support workflows.

EXPERIENCE

June 2026 - Current

Machine Learning Engineer | FlyRank AI | Pakistan

- Built a content-refresh scoring pipeline across 50,000 anonymized search-content records, covering feature preparation, baselines, model comparison, evaluation, and ranked recommendations.
- Compared logistic regression, decision tree, and random forest models using a client-holdout split; selected a random forest model achieving 0.65 Precision@50, significantly outperforming the 0.24 rules baseline.
- Produced an explainable review queue identifying 3,578 high-confidence opportunities with reason codes, privacy safeguards, and human editorial review guardrails to enhance the decision-making process.

CUSTOM

Machine Learning, Generative AI, LLMs, RAG, AI Agents, scikit-learn, pandas, NumPy, LangChain, LangGraph, Hugging Face, vector databases, Python, FastAPI, Pydantic, REST APIs, Streamlit, React, TypeScript, Tailwind CSS, Jupyter, Pytest, Git, GitHub

EDUCATION

2028

B.S. | Artificial Intelligence

Iqra National University, Peshawar
